Experiments

- 06/2023 • **Time Series Conference Paper**
Present
AI Developer
 - Experiment in Time Series or Signal processing
 - Building Training pipeline with Python via Colab
 - Enhance Tuning parameters with over 2,000 runs in 8 hours
 - Experiment in Machine Learning methods with Scikit-learn
 - Experiment in Managing experiment results
- 10/2023 • **Quy Nhon AI Hackathon 2023**
AI Developer
 - Get notices by mentors
 - Experiment in building and training Transformer models
 - Experiment in building Recommendation system
- 09/2023 • **FPT Digital Race Competition**
AI Developer
 - Winning Third prize
 - Build training & Data augmentation pipeline with Python
 - Enhance Development cycle in AI process
- 07/2023 • **Unihack 2023**
AI Developer & Full-stack developer
 - Winning Second prize
 - Experiment in Object detection with YOLOv8 and TACO dataset
 - Experiment in building AI Back-end system with Flask
 - Experiment in building Mobile with Flutter
- 05/2023 • **Face Recognition**
07/2023
AI Developer & Full-stack developer
 - Experiment in building Face Recognition solution
 - Experiment in building AI Back-en system with Flask
 - Experiment in building Web with ReactJS
- 04/2023 • **Enhance Face Recognition with Ensemble Deep Learning**
Present
AI Developer & AI Researcher
 - Experiment in building Face Recognition with SOTA models
 - Experiment in writing scientific paper

Certificates

Deep Learning AI • 12/2023

AI Deep Learning course by
Andrew Ng.

GDG Devfest • 11/2023

Devfest Hackathon by GDG
Mien Trung

Deputy Lead at GDSC-FPTU • 10/2023

Deputy Lead at GDSC FPT
University Da Nang

Google Solution Challenge • 06/2022

Solution Challenge competition by
Google Developer Student Clubs

Objective

I am currently in the third year of FPT University and major is Artificial Intelligence. I am a code-holic guys and experimented with severel Freelance jobs. I will building and developing AI solution with high accuracy and efficient.

Technical Skills

Python • 8/10

Able to build apps, AI, libraries

TensorFlow, PyTorch • 5/10

Able to build custom ML, DL models

Git, Github • 7/10

Familiar with version control tools

Flask, FastAPI • 8/10

Able to build Back-end solution for AI

Docker • 3/10

Able to create simple Container

Jira, Trello • 8/10

Familiar with task tracking tools

Soft Skills

Team Working

Able to work with medium team size

Leadership

Able to manage a team, efforts,
performance, handle mental issues

Languages

English

Archived IELTS 5.5

Japanese

Language understanding
